Focus on Kids Pediatrics is excited to announce that we are partnered with CHADIS to help us provide the best possible care for your child!

CHADIS is a secure, HIPAA compliant website that allows you to complete developmental and behavioral questionnaires online when it is convenient for you. In addition, utilizing CHADIS allows you to invite teachers, grandparents and other caregivers to complete questionnaires that will provide additional information regarding your child. It can be accessed on multiple devices including a computer, tablet or smart phone.

Benefits of CHADIS

- Allows for you to input your child's medical history and background prior to their appointment so you will not have as much paperwork to complete in the office.
- Documents your child's/children's milestones.
- Allows for you to let us know of any issues or concerns you want to discuss at the appointment.
- All answers are completely confidential.

How to use CHADIS

1. Go to www.focusonkidspeds.com and click on the Portal link in the upper right corner and select Patient Portal and log in. Please call the office if you are unable to access the portal.
2. On the home page, click on the CHADIS button in the Fill Milestones Box. This will open the CHADIS website in a new window.
3. Click on **Go** to complete the questionnaires that have been assigned for your child.
4. After completing each questionnaire, click on **Send It I'm Done**.

After registering for CHADIS via our Patient Portal, you should be able to log in from either the Patient Portal or by going to CHADIS.com and using the log in information that you used to set up your CHADIS account. Please let one of our staff members know if you have any questions or need assistance getting logged in.

Please make sure to complete these questionnaires no sooner than 1 week before your child's appointment so they will be accurately based on their age.

Thank you and see you soon!
